Art Unit: 2644

## **DETAILED ACTION**

## Allowable Subject Matter

Claims 1-39 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art references, Belt et al, US Patent 6,774,934 and Matsuo, US Patent Application Publication 2003/0179890 do not disclose nor suggest the features of independent claims 1, 19, 31, 35, 39 and 40. Specifically, Belt and Matsuo disclose methods and apparatuses for determining the direction of an acoustic sound source using a plurality of microphones. Each reference calculates a correlation function (element 7 of Belt and element 109 of Matsuo) to determine the direction of the sound source. However, there is no disclosure or proposal to rank possible time delays between two acoustic signals, map each microphone sample to a sub-surface of potential acoustic source locations, and calculating a weighted value of cells in a boundary surface which intersects each of a plurality of sub-surfaces, as claimed in claims 1, 35 and 40. As to claims 19 and 31, the prior art references of record do not specify mapping the microphone samples to a cone of potential acoustic source locations, as required by the claims. Regarding claim 39, Belt and Matsuo do not disclose calculated a weighted value on each of a plurality of cells of a common boundary surface the weighted value on each cell being indicative of the likelihood that the acoustic source lies in a bearing direction passing through the cell.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian T. Pendleton whose telephone number is (703) 305-9509. The examiner can normally be reached on M-F 7-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Forester W. Isen can be reached on (703) 305-4386. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
